Wiring Diagram

HMS Face Recognition System

Wiring Requirements:

- AC220V power wire: recommend to use 3x1.0mm (or above) wires to prevent electricity leakage. The ground wire of the power wire is recommended to be grounded.
- Electric lock wire: must use 2x1.0mm (or above) wire, the maximum length of the cable shall not exceed 50 meters.
- TCP/IP communication wire: please use standard network cable, the maximum length of the cable shall not exceed 100 meters.
- Door sensor and exit button wire: recommend to use 2X0.5mm (or above) wire, the maximum length of the cable shall not exceed 100 meters.

REMARK

- Power on, locked: (electric bolt lock or electromagnetic lock) correct connection: the positive electrode of the electric lock connects to the +12 port of power supply port, the negative electrode of the electric lock connects to the NC port of the controller, the COM port of controller connect to the GND port of power supply.
- Power on, unlocked: (electric control lock or electric lock port) correct connection: the positive electrode of the electric lock connects to the +12 port of power supply port, the negative electrode of the electric lock connects to the NO port of the controller, the COM port of controller connect to the GND port of power supply.
